

Normal Depth Cartridge Pleated Filter

Filter Data Sheet

AJR Filtration introduces a new nominal rated filter cartridge, the **NDC Pleated Filter**.

Due to the unique design of this pleated cartridge, it provides 5 to 10 times the surface area (depending on micron). Dirt holding capacity and efficiency are maximized by pleating two layers of nominal felt to create a pre-filter & final filter layer.

The two layer pleat pack is designed for higher flow applications with a lower initial pressure drop. Thermally bonded end caps prevent particulate by pass.

- Available in Polyester or Polypropylene construction
- Micron ratings from 1-200
- Fits most Size #1 or #2 strainer baskets
- Polypropylene and Polyester materials meet FDA regulations for food contact under CFR21, Section 177.1520
- Broad Chemical Compatibility
- Temperature ratings to 200°F (PO), 275°F (PE)
- Silicone-free construction

Micron	Pleat Pack Construction
1	5/1 pleat pack
5	10/5 pleat pack
10	25/10 pleat pack
25	50/25 pleat pack
50	75/50 pleat pack
75	100/75 pleat pack
100	200/100 pleat pack
200	200/200 pleat pack

X100 Replacement end cap

Ordering Information

NDC	Micron	Media	Length	Cap Style
	See Chart	PE - Polyester	12 (Size #1)	SC = Small Cap - 6 5/8"D
		PO - Polypropylene	26 (Size #2)	BC = Big Cap - 7 1/8"D
				F = X100 Repl.
				AR = Flanged Cap
